

## A first-class tool for a perfect control on your shipping process

We at duisport know the processes of shipping capital equipment into the smallest detail. That is why we designed the app with functions that will make your life easier and provide transparency for the shipper and the receiver. Inside the app you will find this – and much more if you want to:

- ✓ Tracking and tracing of lots, packages and loose parts
- ✓ Claim Management in real time
- ✓ Linking pictures to shipping documentation
- ✓ Button for time-delayed sending in case you are temporarily offline
- ✓ Digital signature to confirm delivery
- ✓ Individual storage management
- ✓ Interface documentation with confirmation of receipt

## Excellent logistics know-how for excellent logistics services – worldwide!

For more than 40 years, duisport packing logistics, a subsidiary of Duisburger Hafen AG, is offering its' clients packing concepts and services for transportation from large scale industrial plants up to the smallest pieces. 25 years ago, duisport packing logistics introduced the loose parts management system – by then an innovative concept unheard of for steering shipping processes as an integral part of the overall logistics project management. That is why supply chain collaboration and Industry 4.0 is more than a concept to us: It has been reality ever since.

As packing specialist with more than 20 facilities in Germany, Belgium, France, The Netherlands, India and China and our large service portfolio from packing via storage to transportation solutions, we are successfully positioned on the international market and one of the industry leaders today.

## Tracking, Tracing Construction Site Organization Safe, fast and transparent

The app for brilliant loose part logistics

**The mobile shipping and completeness control that fits right into your pocket – Always and everywhere**

Between dispatch and the arrival of investment good there often is not just a great distance to overcome. It is also time consuming: during ocean transit, on the roads, upon arrival, during receiving and during storage on the construction site.

Let's turn this time into a safe and secure time! Duisport packing logistics has developed an app that provides hassle-free and transparent tracking of your goods – until storage on site. With this multi-lingual app, you don't need a laptop computer anymore, no permanent internet connection is required any longer, no paper for running inventory checks and status documentation.

All that you need for tracking your goods from dispatch until arrival is your mobile device or tablet computer.  
**Anywhere in the world. At any time.**

The App is available for

**All you always wanted to know at a glance, at one place**

The Duisport packing logistics app is a smart tool that can be used by any authorized user everywhere in the world at any time.

**Requirement:** the dpl loose parts management system has been applied during packing and all loose parts and packages have been labeled and packed. Then just apply for your account at dpl, nominate eligible users along with user rights, install the app with the log-in details provided by dpl – and you are ready to go. The original details of your project have already been downloaded into the app.

**Application:** Now you can scan the labels with your mobile device or tablet computer – even in case you are offline temporarily. At your desktop computer you will get full insight into the status and history of your consignment – from entire lots until the individual loose part – worldwide with GPS coordinates, event notifications in real time, photo documentation (if required) and construction site logistics.
