

Container Freight Station Solutions

UNLIMITED POSSIBILITIES FOR
ALL YOUR CONTAINER NEEDS

duisport 

About CFS Solutions

The CFS Solutions division of the Duisport Group is specialized in stepping and stripping (loading and unloading) of containers and offers their customers complete solutions from one source for their goods. The organization of transportation via road, rail or ship is also included in our service portfolio.

A container serves as a mode of transportation and not merely as packaging. Therefore, not only the correct design of this packaging is critical, but also how the packed goods are fastened in the container itself. Depending on how the goods are pre-packed, stuffing a container can be a challenge. Especially heavy, bulky goods require special equipment and considerable experience to stuff it optimally in a standard or special container and to fix it securely.

Certifications:

✓ AEO-F certified locations

✓ Quality management according to DIN EN ISO 9001:2015

✓ Environmental management according to DIN EN ISO 14001:2015

✓ ISPS certified port facility

✓ Packaging standard HPE
